The Operation of the Company

The Chairman	Advance Company Debt up to 3 (or more with consent of Court). Increase Balance by £5 each.	Then allocate all Balance to office treasuries.	
Director of Trade	First, may Special Envoy. Then, make up to two transfers. Each moves one writer or ship between Presidencies or sea zones.	Special Envoy: Roll 1 die for each £1 spent. If successful, open trade with China or open one closed order in a region **not** Company-controlled.	
Manager of Shipping	Spend funds to fit ships, placing them in any sea zone. You may only hold £2 in your treasury (the rest must be spent).	£2 for extra ships. £3 for ships on shipyard. £5 for Company ships **if all player ships have been fitted.**	
Military Affairs	First, make up to two Army transfers. Each moves one officer or regiment between Army boxes.	Then, assign pieces in Officers-in-Training box to Armies.	Finally, appoint Commanders if vacant or if another player has the most total pieces in that Army. You decide ties.
Presidency Operations	Presidents decide the order they, their Commander, their Governors act. Presidents may Trade. Declare the regions you wish to Trade in. *(You cannot declare more than you could Trade with)* Roll 1 die for each £1 spent. Subtract 1 die for each region declared that is not your home region.	If successful, fill orders up to the number of ships in your sea zone in declared regions. When filling orders, start with home port, then adjacent and empty open orders. Writers must be placed first. Increase Balance by amount listed.	Players gain £1 for each writer placed. You gain £ equal to # of filled orders. **Important: Each President may only have one successful trade per turn!**
Commander	First, may purchase local alliances using cash in President's treasury with consent of President. Then may Deploy. Select a target from the following: ☛ Home region. ☛ Controlled-region associated with your President with at least one unrest or closed order. ☛ Region adjacent to those that is not Company-controlled.	Roll 1 die for each officer, regiment used. In addition roll dice equal to the strength of any alliances used. Subtract 1 die for each tower level of your target. Then, players roll 1 die for each officer and remove if a 6 is rolled. If successful, gather loot. Take £4 for each tower level plus loot modifier *if faceup* (minimum officers participating + 1)	Divide loot as follows: Going from Commander and clockwise players take: ☛ £1 if they are Commander. ☛ £1 for each officer used. After going around, pay £1 for each regiment and local alliance to bank. Then repeat if loot remains.
	Then, after Dividing Loot, Commander takes one trophy token for each tower level. Open all orders in the region and remove any unrest. Create Governorship (if not already Company-controlled). If a catastrophic failure, the Commander is removed and loses half (round up) of their trophies.		
Governor	May Administer using your dice pool. If successful, you gain £1 and pick a result. If you do not succeed, add an unrest. Then reduce dice pool by one regardless of success. If successful after an attempt that was not successful, gain £2 instead of £1.	The Administer results are as follows: ☛ Place a regiment in your President's Army. ☛ Place Company ship in region. If already there, move it to your President's sea zone instead. ☛ Increase Company Balance or President's treasury by £2. If done more than once this turn, add an unrest each time this is chosen.	
Superintendent of Trade in China	May Trade in China once. Roll 1 die for each ship in China. If successful, increase Balance by £4 for each export icon in a Company-controlled region.	If successful, you gain £1 for each export icon in Company-controlled regions.	
Governor General	First, increase Balance by £3 for each Company-controlled region. Then may Govern. Roll 1 die for each £1 spent. For each 6 rolled, add one unrest to each Company-controlled region. If unsuccessful, add one unrest to each Company-controlled region. **Important: the Governor General may only have one successful Govern per turn!**	If successful, you gain £ equal to Company-controlled regions. Then pick 1 result for each Company-controlled region from the following: ☛ Place a regiment in any Army. ☛ Place Company ship in any sea zone (including China if open). ☛ Increase Company Balance or any office treasury that is not your own by £2, and add an unrest to a region. If taken multiple times, you may not stack unrest from this action in the same region.	

Events in India

WINDFALL
Players with writers in this region and adjacent regions take £1 per writer.

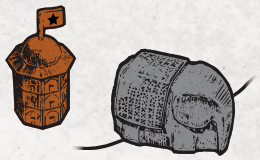

SHUFFLE
Resolve the Elephant's March. Then shuffle this card with the deck. Then shuffle discards and place on top of deck.

TURMOIL
Close northernmost order.

If all are closed, perform a Cascade: close all orders connecting to orders in this region. If already closed, close the northernmost open order in this region. If all orders in this region are closed, perform a Cascade here.

PEACE
Resolve in regions touching the Elephant. Open any connecting orders between regions. Add one strength to each tower. If the Elephant is fully within a region, open all orders and remove any unrest.

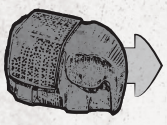

CRISIS
Use Elephant position to determine Crisis type (not pictured region).

Crisis Type	Attacker Strength	Defender Strength	Successful (defender wins ties)	Unsuccessful
Invasion 	Attacker + Its Empire + Crisis Modifier	Defender + Its Empire	Empire expands. If defender was capital, their empire shatters.	Lower attacker's strength.
Rebellion 	Attacker + Crisis Modifier	Defender	Attacker removes flag **and closes all orders.** Remove capital's flag if it no longer has an empire.	Lower capital's strength.
Attack on the Company 	Attacker + Its Empire + Unrest + Crisis Modifier	Exhausted Regiments, Officers, and Local Alliances	Region Loss: Tarnish Commander, Officer Rout, Governor Elimination, Restore Local Authority **(close all orders!)**, Company Humiliation. *If attacked by sovereign, empire expands.*	Clear unrest. Commander gains a trophy.

LEADER
If this region is sovereign, add a level to its tower. Otherwise, resolve Rebellion or Attack on Company in the pictured region using the indicated strength (and any unrest).

FOREIGN INVASION
Roll storm die and resolve an invasion in each region linked to a storm (or pictured region if none). For each, roll a die to determine strength. If a region is defeated, close all orders there and set its strength to half (round down) of strength.

Remember, when the Company is attacked, resolve an attack on the Company in all regions with unrest. Order of resolution is by Presidency then at Commander's discretion.

ELEPHANT'S MARCH
If marching after a successful Invasion *(Imperial Ambitions)*, move to the capital's region. Otherwise move the Elephant to the pictured region.

If sovereign (capital flag or dome with no flag) :
Place Elephant on border matching symbol facing away from capital (or next clockwise border that is not already part of empire).

If dominated by another region:
Place Elephant on border facing capital.

If Company-controlled:
Place Elephant fully within.
